1. Comments Overview

If you select Discuss in the menu, you can see the comments that users wrote to the problems, sorted by date and starting with the most recent ones. As an admin, you have an additional button that toggles unresolved/all comments. Unresolved comments are comments, that need a reaction by an admin. An appropriate reaction could be just answering the comment, changing the file, deleting the comment or marking the comment as “No answer necessary” or “Can’t resolve this”.

In the window below, all unresolved comments are listed and a number shows that there are 78 at this moment.

The screenshot shows the 'Discuss' section of the Tsumego Hero Premium website. The top navigation bar includes 'Home', 'Collections', 'Play', 'Highscore', 'Discuss', 'Sandbox', 'Leaderboard', 'Boards', and 'Sound: ON'. The user 'SkaterStan' is logged in at 'Level 100'. The 'Comments' section has tabs for 'ALL', 'PREV. PAGE', 'NEXT PAGE', and 'UNRESOLVED(78)'. A red circle with the number '1' is next to the 'UNRESOLVED(78)' tab. Below the tabs, there are two columns of comments. The left column shows comments #1, #2, #3, and #4. Comment #1 is titled 'Korean Problem Academy 2 Part 2: 15k-5k - 156' and has a red circle with the number '2' next to its title. Comment #2 is titled 'Tsumego Dictionary Volume III Part 1 - 976'. Comment #3 is titled 'Pretty Area Secret Area #1 - 9' and has a red circle with the number '3' next to its title. Comment #4 is titled 'Easy Capture - 74'. The right column shows comments #1, #2, and #3. Comment #1 is titled 'Tesuji Training Part 1 - 151'. Comment #2 is titled 'Easy Kill - 147'. Comment #3 is titled 'Easy Kill - 147'. Each comment shows the user's name, the date and time, and the number of replies. Comments #1, #2, and #3 in the right column have a message from the admin: 'Your comment has been removed.'

1. This button toggles the view for unresolved/all comments.
2. To reply to a comment, go to the page of the problem.
3. If the admin has not solved the problem, he can neither see the comment nor download the file. This ensures that level and rank of the admins are still valid.

2. Problem Page

On the problem page, you can check the user's statement and do modifications, if necessary.

Comments

Farkas:
First move can be also Br4, after that, if Wq4, then Bp1. If W captures instead of q4, then Bq4 takes the 2nd eye.

9. January 2020 05:13
Answer 4

1. If description, hint or xp of the problem needs an adjustment, you can do it there.

Black to play. (Edit)

b to play.

hint

10

Submit

"b" gets replaced by "Black" or "White" by the webserver.

2. If you want to modify the problem, download the file over "Admin-Download SGF".
3. After you modified the file, you can upload it by selecting "Admin-Upload SGF"
4. You can reply to the user by selecting "Answer". A dropdown with various options will show up.

3. Answer Options

The expanded answer window has a text field and other options that might be useful.

The screenshot shows a web interface for a comment system. At the top, there's a 'Comments' dropdown menu. Below it, a comment by 'Farkas' is displayed, dated '9. January 2020' at '05:13'. The comment text is: 'First move can be also Br4, after that, if Wq4, then Bp1. If W captures instead of q4, then Bq4 takes the 2nd eye.' To the right of the comment is a blue 'Answer' link. Below the comment, there's a large text input field labeled 'Message' (marked with a red circle 1) and a 'Submit' button. To the right of the message box is a dropdown menu (marked with a red circle 2) containing several predefined response options. The first three options are 'No Answer Necessary', 'Can't Resolve This', and 'Delete' (marked with a red circle 3). The dropdown menu is currently open, showing these options.

1. You can give the user an individual answer by writing into the message box.
2. As there are many recurring situations, you can select predefined text blocks from this dropdown list.

The screenshot shows a dropdown menu with a list of predefined response blocks. The list includes: 'Your moves have been added.', 'Your file has been added.', 'Your solution has been added.', 'I disagree with your comment.', 'Provide sequence.', 'Resolved.', 'I couldn't follow your comment.', 'You seem to try sending non-SGF-files.', 'Your answer is inferior to the correct solution.', 'I disagree with your comment. I added sequences.', 'I don't know.', 'I added sequences.', 'You are right, but the presented sequence is more interesting.', and 'I didn't add your file.' The dropdown menu is currently open, showing these options.

3. Examples for selecting "No Answer Necessary" are users who reply to each other or complimenting on a good tsumego.

"Can't Resolve This" needs to be selected when the webmaster needs to check the issue.

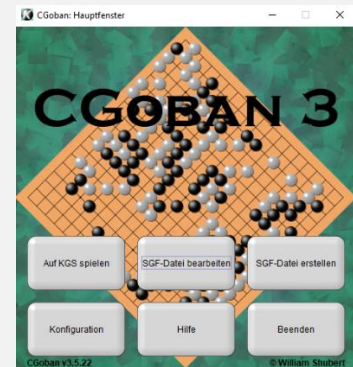

Spams, trolls etc. can be deleted.

4. Editing Files

Please use CGoban for editing the files. The language doesn't matter. Other editors might work too.

You can download CGoban here:

<https://www.gokgs.com/download.jsp>

Open the file and edit the paths or the initial position.

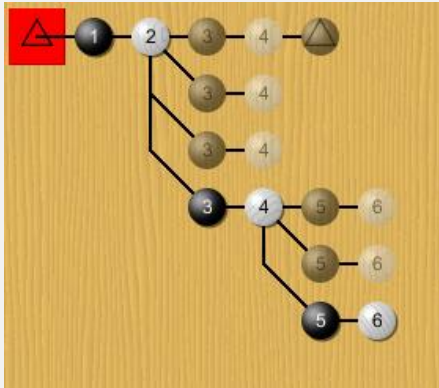

1. In the upper left corner, you find various tools that you might need.
2. This is the sequence tree. It follows these conditions:
 - Black is always the user.
 - Incorrect sequences end with white.
 - Correct sequences end with black and a + as comment.
 - No other comments allowed.
3. In this field you enter the + for the correct sequences

5. Tree Complexity

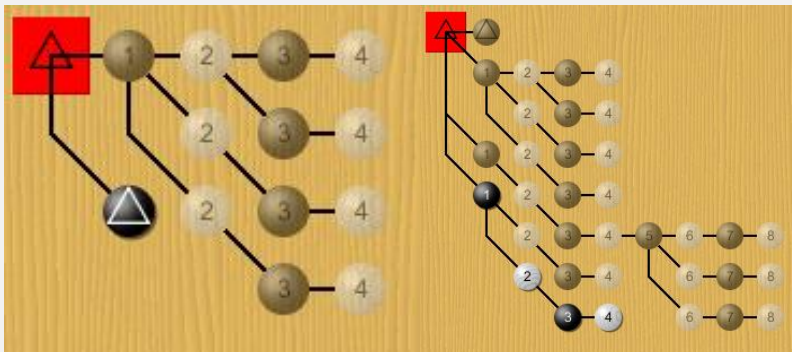

Multiple black choices

When black has multiple choices, the webserver follows the path that is picked by the user. If the user picks a not existing move, the output is "Incorrect". Black can have as many broad and deep choices as you want. Example:

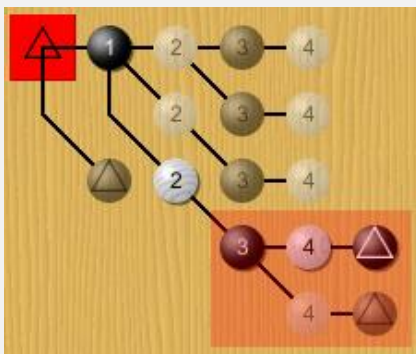

Multiple white choices

White is always the A.I. White can have any amount of broad choices. The webserver will randomly pick one. The two trees below are both valid.

The webserver can only pick a random path once per sequence. So this tree would cause an error, as white has to choose a branch after it had already chosen between branches.

6. File-Errors

Errors in the file can happen for various reasons e.g. bad tree structure, comments, sequences end with black but are not marked, incompatible editors etc. Any file errors result in the board not showing up and all JavaScript routines not being executed. So, it looks like this:

The screenshot shows the Tsumego Hero Premium web interface. At the top, there is a navigation bar with links: Home, Collections, Play, Highscore, Discuss, Sandbox, Leaderboard, Boards, and Sound: ON. The user's name, SkaterStan, and level, Level 100, are displayed in the top right corner. The main content area shows a problem titled "Korean Problem Academy 2 156/200". Below the title, there is a "Black to kill. (No Ko) (Edit)" prompt and a "b to kill." input field. A "Submit" button is located below the input field. To the left of the input field, there are two rows of red hearts. Below the input field, there are three buttons: BACK, RESET, and NEXT. Below these buttons, there is a row of numbered buttons: 1, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, and 200. Below the numbered buttons, there is a "Download SGF" link. Below the "Download SGF" link, there are two links: "Admin-Download SGF" and "Admin-Upload SGF". Below these links, there is a "Browse..." button and a "Submit" button. Below the "Browse..." button, there is a message box with the text "Did you find a misplay or mistake? Please leave a message". Below the message box, there is a "Submit" button. Below the "Submit" button, there is a "Upload SGF" link. Below the "Upload SGF" link, there is a "Browse..." button and a "Submit" button. Below the "Browse..." button, there is a "Comments" section. The "Comments" section shows a comment by "Farkas" dated "9. January 2020 05:13". The comment text is "First move can be also Br4, after that, if Wq4, then Bp1. If W captures instead of q4, then Bq4 takes the 2nd eye." Below the comment, there is a "Message" input field and a "Submit" button. To the right of the "Message" input field, there is a dropdown menu with the text "No Answer Necessary", "Can't Resolve This", and "Delete".

If this happens, please revert changes in the file and try to upload again. If you are not able to recover the file, please contact the webmaster.

7. Adding problems

The sandbox contains all new problems that need to be checked for improvement. Every Sunday, a few of the sandbox problems are published. Users are invited to participate in adding problems and bringing in own ideas for new collections.

SkaterStan Level 101

Tsumego Master
by various creators

The single most important task for players who wish to reach higher dan levels is to develop their ability to read out positions. The quickest and most efficient way to do this is to solve tsumego problems. This collection contains difficult problems from various sources. You can only master them, if you read deeply and accurately.

39 Problems
Solved: 0%

Add Problem

Number: 221
Difficulty: 7
Submit

1. To add a new problem, select the plus button. The numbers for new problems increment by one. If this doesn't fit the structure of the collection, adjustments can be made and individual problems can be deleted.
2. You can also create problems by filling out the Add Problem form and select the submit button. This gives you the opportunity to specify the properties of the problem on creation.

8. Deleting problems

Endgame Tesujis 188/188

delete

To delete a problem, go to the page of the problem, select Edit at the problem description and type “delete” into the given field.

9. Monitoring Admin-Activities

A page with all admin-activities can be shared among the admins. This could be helpful to avoid mistakes like uploading the wrong file or misreads. It can also help avoiding two admins answering comments at the same time.
